LOG OF REVISIONS

Below is the log of revisions to the CC11-160 Carbon Cub SS Illustrated Parts Catalog. Please note any changes made.

Revision	Pages Affected	Date	Description of Change
NC	ALL	August 30, 2012	Initial Release

NOTICE: Cub Crafters, Inc. reserves the right to obsolete, revise, and/or remove any part(s), part numbers, or part descriptions that may be used in this catalog without prior notice.

INTRODUCTION

This Illustrated Parts Catalog contains illustrations, tables, and indexes to aid in the ordering of replacement parts and assemblies for the CUB CRAFTERS, INC. CC11-160 Carbon Cub SS.

**NOTE: This catalog should not be used for installation or assembly purposes.
Refer instead to the latest revision of the CC11-160 Maintenance Manual.**

USING THE ILLUSTRATED PARTS CATALOG

When You Know the Part's...

DESCRIPTION OR NAME:

- Use the **Description Index**, located on page 106, which contains an alphabetical list of part descriptions. Locating a part's description on the list will provide the corresponding figure and page number for the part.

SPECIFIC PART NUMBER:

- Use the **Part Number Index**, located on page 130, which contains a numerical list of part numbers. Locating an item's known part number on the list will provide the corresponding description and section number for the part.

LOCATION ON THE AIRCRAFT:

- Use the **Table of Contents**, located on page vi, to determine the system that most likely contains the part. The chapters are numbered based on the "ATA Spec 100" numbering system and contain a short title that defines the chapter's content. The section number is made up of the chapter number which contains the section, followed by a dash and the specific section number.

ORDERING PARTS

In order to increase accuracy and timeliness of part orders, always specify:

- Part Number and Description
- Airplane Model and Serial Number (located in aircraft POH)
- Any other information which may help define the part

Any questions regarding ordering information should be directed to:

support@cubcrafters.com : Email

509.248.9491 : Phone

1.877.484.7865 : Toll Free

Any questions or issues with the catalog should be directed to:

parts.catalog@cubcrafters.com : Email

CATALOG LAYOUT

The diagram illustrates the layout of a catalog page. On the left, a page from 'CHAPTER 28 Fuel' is shown with callouts for 'Model' (aircraft view), 'Detail Callout' (lettered boxes A-D), 'Index Number' (circled numbers -1 to -35), 'Page Number' (-35), and 'Aircraft Model Number' (CC11-160). On the right, a parts table is shown with callouts for 'Part Number', 'Description', 'Quantity in Figure', 'Index Number', 'Code Letter', and 'Serial Number'. A note section at the bottom of the table is also highlighted.

INDEX NUMBER	PART NUMBER	CODE	DESCRIPTION	SERIAL NUMBER	QTY.
-1	HOW-3-20		HOSE CLAMP, 1/2-13.175		4
-2	HOW-3-202		HOSE CLAMP, 1/2-13.175		4
-3	SC74700-001		TANK GROUND INSTALLATION, STANDARD		1
-4	SC74700-101		TANK GROUND INSTALLATION, EXTENDED RANGE		1
-5	SC11000-001		* TANK GROUND WIRE		2
-6	AN618-42A		* NUT, WELD LOCK		4
-7	AN910-4L		* WASHER, FLAT, THIN		12
-8	AN32663287	A	* SCREW - TRUSS HEAD		4
-9	SC61000-002		FUEL TANK ASSEMBLY, RH		1
-10	SC61000-001		FUEL TANK ASSEMBLY, LH		1

-31	HOW-100-200		* HOSE CLAMP, 1/2-13.175		4

Note: A Double quantity for install with SC74700-101 (Extended Range)

General Chapter Number and Title – The upper outside corners of each page contain the current chapter number and title. This number will be the same for multiple sections located in the same chapter.

Specific Section Title and Number – The upper inside corners of each page contain the section title and number. The first number is the chapter number followed by a dash and the specific section number. Each section contains only one table located at the end of the section but may contain illustrations on multiple pages.

Aircraft Model Number – The lower middle of each page contains the aircraft model number. This number shows which model is pertinent for the information contained in the given tables, figures, and/or pages.

Page Number – The lower outside corners of each page contain the page number used for locating specific tables and figures.

Model – The upper left corner of each figure often contains a model view of the aircraft. The system or parts contained in the figure are often highlighted in black. Cutout views may also use this model as a reference for location.

Detail Callout – Callout containing a letter inside of a box. This letter corresponds to a detail view located in the same figure. Detail views are specific to a single figure and often contain groups of parts in alternate views.

Index Number Callout – Callout containing a number, or set of numbers separated by commas. These numbers correspond to the index numbers in the matching table. Numbers separated by commas in a single callouts denote parts stacked at a given location, often containing fastening hardware. Index number callouts are specific to a given section and can continue between two figures in the same section.

Index Number – Number that corresponds to single or set of part numbers and is called out by the index number callout. Multiple part numbers contained in a single index number denote either interchangeable parts, or parts that correspond to either left hand or right hand installations (see Description).

Part Number – Specific number that is used when ordering a part or assembly.

Code Letter – Letter used in tables only to denote special cases or instructions for a given part (See Code/Note Section).

Description – Short description of part often containing basic purpose, location, and/or dimensions, used in determination of part during locating and ordering. Descriptions followed by “RH” or “LH” denote different configurations for right hand and left hand installations.

Serial Number – This column contains the specific range of airplane serial numbers which a given part is applicable to. Some parts may have different part revision letters applicable to specific aircraft. The unique revision letter is defined at the end of the part description when necessary.

Quantity in Figure – Value which defines the amount of each part shown in the corresponding figure(s). This value is for an ordering reference only. The latest revision of the CC11-160 Maintenance Manual should be used for final determination of quantities where applicable.

Code/Note Section – The bottom of each table contains a note box, when required, containing code letters and their corresponding notes and/or instructions pertaining to either a specific part or group of parts. Often used to clarify or specify ordering instructions.

ASSEMBLY LAYOUT

Assemblies located in a section are denoted by bullets preceding the part description. An assembly contains every part directly below it that is indented by a bullet. Below is an example of the assembly hierarchy. The “Main Assembly” contains the “Fastener Assembly” which contains both the “Bolt” and “Nut” parts.

CODE	DESCRIPTION	SERIAL NUMBER	QTY.
	MAIN ASSEMBLY		1
	▪ FASTENER ASSEMBLY		1
	▪ ▪ BOLT		1
	▪ ▪ NUT		1

ABBREVIATIONS

Below is a list of abbreviations commonly used in this catalog.

AR	As Required
COM	Communication (Instrument)
LH	Left Hand
REF	Reference
REV	Revision
RH	Right Hand
QTY	Quantity

SERIAL NUMBER SPECIFIC PARTS

Cub Crafters is constantly at work improving current design and creating new products. As a result, some parts installed on a given aircraft may have been modified and the latest production design is no longer applicable to previous aircraft. Cub Crafters maintains this system of changes, called effectivity, with every engineered part and drawing.

This catalog signifies effectivity both through the use of the Code/Note Section as well as the Serial Number column. These should both be checked for any relevant information.

NOTE: Recently modified parts may not yet be included in the effectivity sections of this parts catalog. Always specify Airplane Model and Serial Number when ordering parts.
