

## OUTFIT YOUR CARBON CUB SS WITH THE LIGHTEST, FASTEST AMPHIBS ON THE MARKET

- The spectacular STOL performance the Carbon Cub SS has been widely recognized for is now available to pilots seeking an amphibious float application
- Lightly loaded the Carbon Cub SS amphib will be off the water in 4 seconds (7 seconds at gross weight) and climb with very little penalty
- Throw your gear sack in and head for the back country, your favorite fishing spot, or just get off the beaten path. This magic carpet will put a smile on the face of any seaplane pilot
- Proving that high performance and Light Sport are not mutually exclusive, the Carbon Cub SS is without a doubt the go anywhere, do anything cub

*"The performance penalty in adding the amphib was less than expected in all regards and results in a truly remarkable amphibious aircraft — I'm not aware of any float-plane that gets off the water quicker."*

**-Jim Richmond**  
CubCrafters' Owner and Chairman

- Equipped with a lightweight 180 horsepower engine, the Carbon Cub SS uses 21st Century technology like carbon fiber and 3D computer design technology.
- Baumann 1500A amphibious floats are available as options for the Carbon Cub SS and the Sport Cub S2.
- Landing gear retraction is handled by a lightweight mechanical mechanism with a floor mounted retraction handle.
- Low altitude climb rate for Carbon Cub SS with the Amphibs is still 1,800 fpm at 1,430 lbs gross weight.
- FAA regulations permit the gross weight on Light Sport Aircraft to be increased from 1,320 lbs to 1,430 lbs when floats are installed.

DESCRIPTION	FLOATS	INSTALL	FREIGHT	PRICE	WEIGHT
